TECHNICAL DATA SHEET (1/1)

T - 604101 _ SPIRO CUTTER

General description

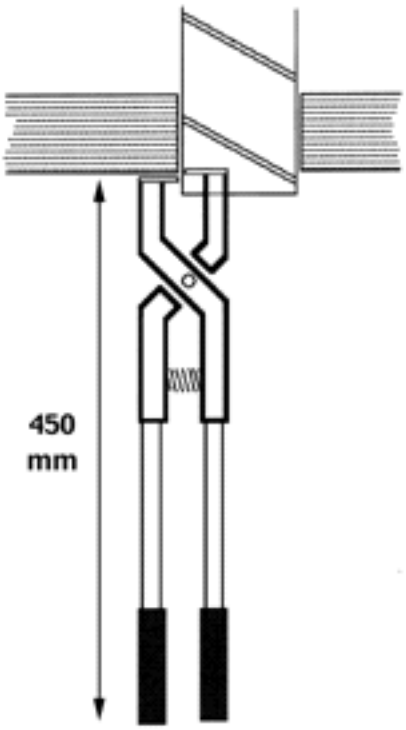

The **SPIRO CUTTER** is a tool that allows you to cut the exceeding part (max. 5-6 cm) of a round duct coming out of the ceiling or out of the wall.

The special locking device must be set up to the larger opening to allow you to insert the longest part of the tool in the spiral duct. After the first cut the device comes down by itself reducing the width of the opening and holding the tool on place until the entire diameter is cut off. It will then drop off the scrap ring.

- Body made of strong machined aluminium
- Two interchangeable hardened steel jaws
- Special locking device holding the tool in place until the entire perimeter is cut off.
- Spring loaded arms
- Long arms for easy direct cut on ceiling
- Rubber protected handles

Application

Information contained herein is based on careful tests and experience. It reflects our knowledge and is for guidance purpose only. It is given in good faith and user should ensure that the product is fit for purpose before any application. The quoted values are average and should not be taken as maximum or minimum values for specific purposes. Manufacturer and distributor are not responsible for any non-recommended use or consequential damage.
