

General description

The **ALIZE** is a self-regulating exhaust valve designed for use with MEV systems in dwellings and commercial spaces.

Not only do they meet regulatory requirements, they also combine aesthetic design with technical performance.

- Meet applicable regulatory requirements
- Easy to install
- Detachable control module for easy cleaning
- Made of white polystyrene.
- Removable grille

Components

The ALIZE valves are 170 mm in diameter and 40 mm deep.

1. dia. 125 collar with lip gasket (supplied separately)
2. Valve body
3. Control module
4. Removable grille

Technical specification

Flow (m ³ /h)	Lw en dB(A)			
	70 Pa	100 Pa	136 Pa	160 Pa
15	23	27	32	35
30	25	30	35	38
